

WEEKLY FIRE WEATHER/ FIRE DANGER OUTLOOK

This product is posted in the Geographic Area website by the close of business every Tuesday during significant wildfire activity, including prescribed fire and is valid for the next 7 days (may be extended to 10 days at the GACC option). This product may be updated to account for significant fire weather and/or fire danger changes. This report should address the following items:

Weather Discussion

Synopsis of weather patterns and critical fire weather events expected over the geographic area.

Fire Weather

Predicted weather, temperatures, humidity, precipitation and significant winds.

Fire Danger

Current and projected fire danger.

Resources

Anticipated changes in resource demand for geographic area based on predicted fire weather and fire danger.

The standard header will be:

WEEKLY FIRE WEATHER / FIRE DANGER OUTLOOK for (valid period)
(Geographic Area) Predictive Services
Issued (date mm/dd/yyyy)

Example:

WEEKLY FIRE WEATHER / FIRE DANGER OUTLOOK for (August 13-19)
